

# Start a Conversation with Your Pediatrician About Your Baby's Gut Health

Keeping your baby safe, healthy, and happy starts with understanding the importance of gut health and being able to recognize the signs that something may not be right.

Talk to your pediatrician about the importance of gut health and how Evivo can play a critical role in safeguarding your baby against the overgrowth of potentially bad gut bacteria.

## What are signs that my baby's gut could use help?

Diaper rash, colic, eczema, sleep issues and elevated fecal pH are all signs that baby's gut may be dominated by too much bad bacteria such as *E. coli*, Colstridia, Staph and Strep.

Diaper Rash

Colic

Eczema

Sleep Issues

## Many baby probiotics. Only one Evivo.

**Our proprietary strain is different from those in all other baby probiotics.**

There are a lot of choices when it comes to infant probiotics. Only Evivo contains activated *B. infantis* EVC001, an evidence-based, proprietary strain demonstrated to increase the abundance of good bacteria and reduce the amount of bad bacteria in baby's gut by 80%.

## When gut pH rises, so does diaper rash.

The presence of *B. infantis* in baby's gut creates a lower intestinal pH, which suppresses the growth of bad gut bacteria. A lower stool pH is less irritating to baby's skin and less likely to cause diaper rash. *B. infantis* in baby's gut ensures complete digestion of breastmilk, leading to fewer loose, watery stools per day.

Based on the link between gut health and stool pH, the specific pH range of 4.5-5.5 is recommended for infants. This updated infant stool pH reference range is now employed by major testing providers nationwide.

Interested in learning more about your baby's gut microbiome? A pH test can be ordered by your doctor today to help determine whether Evivo would be helpful for your baby.

# What's in Evivo? 100% good bacteria for baby.

Evivo. The only baby probiotic clinically proven to reduce bad bacteria in baby's gut by 80%.

## Don't just take our word, here's what others are saying about Evivo

Evivo baby probiotic is the result of over a decade of research and clinical trials with the University of California, Davis.

Our breakthrough findings on the baby gut microbiome and infant probiotics are covered in worldwide publications such as:

The New York Times

Newsweek
